

# Aapo Soukkio

I'm 24- years old IT-student and former mining equipment mechanic from Tampere, Finland. At the moment my main focus is on the Information technology studies that are ongoing at Savonia university in Kuopio, Finland. Studies are focusing on software development and design also basics of network technologies are included. My strengths are interest of deep understanding of SW-technologies, excellent communication skills and perseverance.

Now I am looking for a place where to take my software developer skills to the next level and gain ground on IT-industry. My passion as a software developer is SW-design and problem solving. Design to get understanding and vision for the project I am working for, problem solving to get instant confident to get towards to the next challenge.

I have a decent understanding of the following languages/techniques: C#, Java, JavaScript, SQL, React, HTML, CSS. I am also familiar with Azure DevOps and Github in terms of version controlling. As a private life side at summertime motorcycling takes my free time and at wintertime studies takes nearly all of my time.
